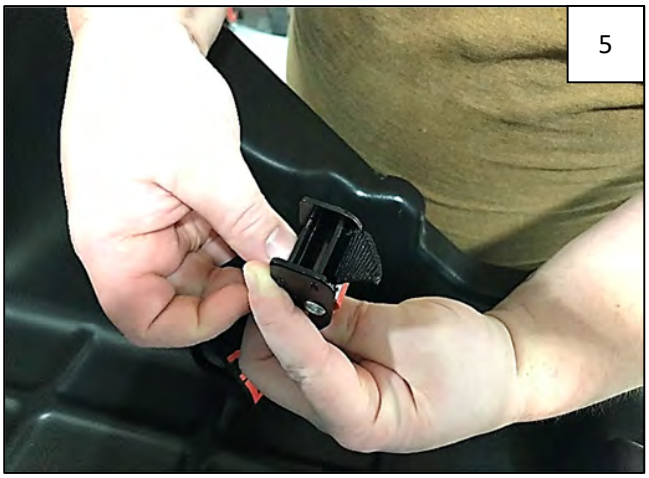
BED STORAGE TRAY INSTALLATION

Pull down tail gate. Place Bed Storage Tray in bed, edge of tray aligning with edge of tail gate.

There are two pairs of slots on each end of the Bed Storage Tray. Locate the tie down nearest either the upper or lower pairs of slots – tie-down locations will vary by vehicle make and model.

Insert the end of a supplied Strap through one of the slots from the inside of the Bed Storage Tray, so that the buckle end of the strap is easily reached.

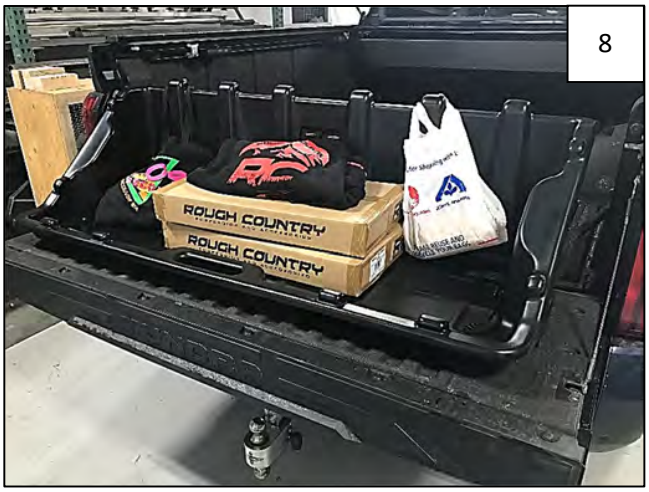
Clip a supplied Carabiner through the tie-down you have selected, then thread the Strap through the Carabiner. This will make it easy to remove the Tray when you need the bed.



Feed the end of the Strap through the other slot and into the buckle.

Position the Bed Storage Tray where you would like it in the bed/tail gate.

Tighten Straps while keeping Bed Storage Tray in position.



Use formed in features/slots around perimeter of Bed Storage Tray to hang bags and store many items in bed.

Use bungee cords (not provided) to secure items being stored in tray. Insert hooks through slots around perimeter of Bed Storage Tray.

Criss-cross bungee cords to secure items.

Slide tray back to close tail gate – tightened straps will keep tray from moving further into bed.
