K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/Million mile limited warranty.

If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.

When applicable, refer to owner's manual for manufacturers installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin air filter.

1. Open the glove box. Fig. 1
2. Unclip the glove box shock. Fig.1 and 2
3. Push the sides of the glove box in to release. This will allow access to the cabin filter housing. Fig. 3
4. Unclip and remove the dirty cabin air filter. Clean any debris that might be present inside the housing. Fig. 4 and 5
5. Install the K&N® cabin air filter with the locking feature facing down. Fig. 6
   NOTE: The locking feature should rest inside the housing locking slot.
6. Reverse steps 1-3 to complete the cabin filter installation. With the K&N® cabin filter installed, clean an area and apply the K&N® Stop Decal. The decal will help notify others that this is a reusable cabin filter.
