FACTOR 55® CLOSED SYSTEM WINCHING®

FLATLINK® WINCH SHACKLE MOUNT

MADE IN USA

Closed system winching with a folding, low-profile design for better approach angles.

The FlatLink allows winch owners to replace the conventional winch hook with a stronger shackle/D-Ring. FlatLink folds neatly into the fairlead when not in use, and allows for a better approach angle than ProLink. Utilized by search and rescue and militaries across the globe, the FlatLink doesn't require splicing and is compatible with steel or synthetic ropes up to 3/8" diameter. It attaches with a super-strong aerospace-grade double-shear titanium pin and snap ring, which is easily installed in minutes. The EPDM rubber guards protect alloy fairleads, prevents rattling, and is securely attached to the FlatLink with four barbed tips. Available in multiple colors to match any rig.

- Easy to install, FlatLink can be used with steel or synthetic winch lines up to 3/8"
- Low-profile design folds against fairlead and provides improved approach angle vs. ProLink
- The eye is retained in the FlatLink with a 5/8" diameter 6Al-4V grade V titanium double-shear pin and internal snap ring for an ultra-secure connection
- Made from machined lightweight billet 6061 aluminum for superior durability
- EPDM rubber guards are attached with four barbed tips and protects fairleads and prevents rattling
- Works with common 3/4" shackles and soft shackles up to 7/16"
- Intended for use with winches 16,500 lbs. in capacity or less
