UNDERSEAT STORAGE BOX INSTALLATION

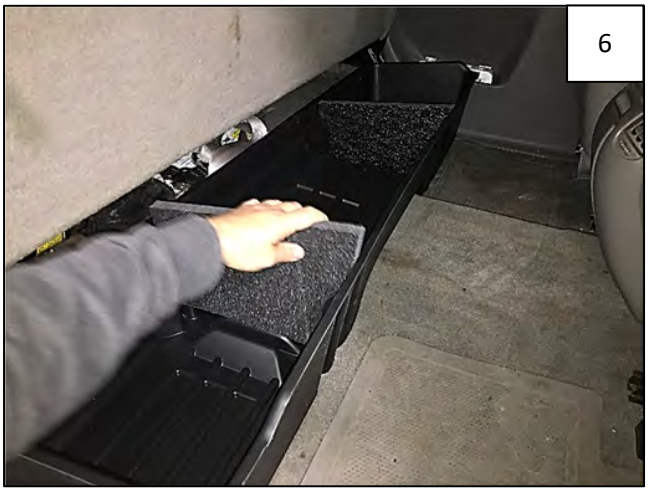
Lift the rear seat for installation of Underseat Storage Box.

Place the Underseat Storage Box as shown. Strap slots should face rear of vehicle. Front of Underseat Storage Box is taller than rear.

Loop each Safety Strap around seat strut on each end of seat near door.

Feed a Safety Strap through each slot in Underseat Storage Box. Thread one Buckle on one end of Safety Strap.

Feed other end of Safety Strap into Buckle and tighten.



Install Foam Dividers in molded-in slots in Underseat Storage Box.

CUTTING DIVIDERS TO STORE LONG ITEMS

If you want to store long items lengthwise in the Underseat Storage Box, lay the item in the Box (over the top of the dividers) in the position you would like to store it in. Alternately, you may remove the dividers and skip the next steps, however, items may shift in transit.

Use a marker or grease pencil to trace the width of the item on each Foam Divider. Remove item and trace the depth at which you would like the item to rest. NOTE: Cutouts should be fairly snug.

Use a utility knife to carefully cut the corresponding section out of each Foam Divider.

Lay long items in Underseat Storage Box as shown, pressing into the cutouts in the foam.
