1 pc

3.

Short Foam Divider
1 pc

TOOLS FOR EASY INSTALLATION:

- Marker or Grease Pencil (optional)
- Utility Knife (optional)

PLEASE READ: Rear cabin area must be free of debris and items prior to installation of Underseat Storage Box.

Rev 1 06-29-23

UNDERSEAT STORAGE BOX INSTALLATION

Lift the rear seat for installation of Underseat Storage Box.

Unscrew the knob holding the jack tools in place. Remove and set aside jack tools; both tools and knob will be reinstalled later.

Place the Underseat Storage Box against the contours of the floor with hole in Box over jack bolt. Front of Underseat Storage Box is taller than rear.

Nest jack tools in driver side of the Underseat Storage Box (against rear of box) and reinstall knob removed in Step 2.

Install Foam Dividers in molded-in slots in Underseat Storage Box.

Lower Seat into place. Underseat Storage Box installation is complete.

CUTTING DIVIDERS TO STORE LONG ITEMS

If you want to store long items lengthwise in the Underseat Storage Box, lay the item in the Box (over the top of the dividers) in the position you would like to store it in. Alternately, you may remove the dividers and skip the next steps, however, items may shift in transit.

Use a marker or grease pencil to trace the width of the item on each Foam Divider. Remove item and trace the depth at which you would like the item to rest. NOTE: Cutouts should be fairly snug.

Use a utility knife to carefully cut the corresponding section out of each Foam Divider.

Lay long items in Underseat Storage Box as shown, pressing into the cutouts in the foam.
