K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10 year/Million mile limited warranty.

If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.

When applicable, refer to owner's manual for manufacturers installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin air filter.

1. Open the glove box and carefully push inward on the sides to allow it to be dropped below the stops. The glove box can now be removed, without any tools, to access the cabin filter. Fig 1
2. Using both hands, squeeze the 4 tabs and remove the dirty filter by pulling it towards you. Figs. 2 & 3
3. Remove any dirt and debris that may be present in cabin filter housing.
4. Install the K&N® cabin air filter as shown, with the tab feature at the bottom of the filter. Fig. 4
5. Install the supplied K&N® cabin filter cover by pushing it into the housing. To remove it for cleaning, simply squeeze the 4 tabs like the OEM cover. Figs. 5 & 6
6. With the K&N® cabin filter installed, clean an area on the housing and apply the K&N® Stop Decal. The decal will help notify others that this is a reusable cabin filter.
7. Re-install the glove box.
