**INSTALLATION INSTRUCTIONS** **FORM NO. 82251**

## F250/F350

**NOTE: All surfaces should be clean and dry before attaching brackets.**

1. Place wheels in a straight forward position.
2. Place stabilizer bracket “A” against inside of frame as shown. Place back up strap on the outside of frame. Install bolts through back up strap and through bracket “A”. Secure with lock washers and nuts provided.
3. Attach both stabilizer piston rod ends to bracket “A” using bushing stack up instructions printed on bag.
4. Loosely attach stabilizer bracket “B” to the tie rod as shown using u-bolt and flange lock nuts.
5. Attach both stabilizers to bracket “B” as shown using bushing stack up instructions printed on bag.
6. Extend stabilizer piston rods 4 1/2 inches. Rotate bracket “B” to obtain best location. Tighten all nuts securely on u-bolts.
7. Turn wheels fully to the right and left making sure that no interference occurs and that wheel stops are fully contacted.
8. Re-check all nuts and pal nuts for tightness before releasing installation.

BOX CONTENT
