- 14mm socket
- Marker or Grease Pencil (optional)
- Utility Knife (optional)

PLEASE READ: Rear cabin area must be free of debris and items prior to installation of Underseat Storage Box.

Rev 1 05-15-23

UNDERSEAT STORAGE BOX INSTALLATION

Lift the rear seat for installation of Underseat Storage Box.

Using a 14mm socket, remove bolt at base of seat belt bracket under seat (1 place).

Place the Underseat Storage Box as shown. Strap slots should face rear of vehicle. Front of Underseat Storage Box is taller than rear.

Feed Safety Strap through the wide slot in the supplied Metal Bracket.

Slide Metal Bracket-Strap combo over bolt removed in Step 2. Reinstall bolt.

Thread buckle onto one end of safety strap. Feed other end of Safety Strap into Buckle and tighten to anchor Underseat Storage Box in place.

Install Foam Dividers in molded-in slots in Underseat Storage Box.

Complete Underseat Storage Box installation.

CUTTING DIVIDERS TO STORE LONG ITEMS

If you want to store long items lengthwise in the Underseat Storage Box, lay the item in the Box (over the top of the dividers) in the position you would like to store it in. Alternately, you may remove the dividers and skip the next steps, however, items may shift in transit.

Use a marker or grease pencil to trace the width of the item on each Foam Divider. Remove item and trace the depth at which you would like the item to rest. NOTE: Cutouts should be fairly snug.

Use a utility knife to carefully cut the corresponding section out of each Foam Divider.

Lay long items in Underseat Storage Box as shown, pressing into the cutouts in the foam.
